

Frontend Development Assignment - Django Blog Application

Objective

Design and implement the frontend (UI/UX) for the Django Blog Application using HTML, CSS/Bootstrap, and Django Templates.

Task 1: Base Layout

Create base.html with navbar, footer, and content block using Bootstrap.

Task 2: Home Page

Display posts with title, image, short content, and 'Read More' button.

Task 3: Login Page

Design login page with username, password, and login button using Bootstrap.

Task 4: Signup Page

Design signup page with username, email, password, confirm password.

Task 5: Create Post Page

Design form for title, content, and image upload. Use `enctype='multipart/form-data'`.

Task 6: Blog Detail Page

Display full blog content, image, author name, and date.

Task 7: Styling

Use Bootstrap for responsive and clean UI.

Task 8: Conditional Navbar

Show Login/Signup for guests and Create Post/Logout for logged-in users.

Task 9: Deployment

Push project to GitHub and deploy using Render.

Bonus Tasks

Edit/Delete UI

Like button

Comment section

Pagination

Dark mode

Important Instructions

Do not modify backend logic. Focus only on frontend. Use Django templates and maintain structure.

Submission Requirements

- 1) - GitHub Repository Link
- 2) - Live Deployment Link (Render/Docker)
- 3) - Google Form Submission: <https://forms.gle/X6hCrkXpoGJPFzW47>
